SUMMARY

Computer Science Engineering student at VIT Bhopal (CGPA: 8.4) with hands-on experience as a full-stack developer building production-grade MERN stack applications with RESTful API design, Generative AI integrations, and secure JWT-based authentication. Completed two industry internships delivering measurable results in enterprise IT environments. Strong problem-solving skills with a collaborative, ownership-driven approach to software engineering. Seeking full-time or internship roles in software engineering, full-stack development, or data science and analytics.

EDUCATION

VIT Bhopal University

Bachelor of Technology – Computer Science Engineering | CGPA: 8.4

Bhopal, Madhya Pradesh, India

Aug 2023 – Aug 2027

Doon International School

Senior Secondary Certificate (10+2) – Science (PCM)

Bhubaneswar, Odisha, India

Aug 2022 – May 2023

DAV Public School

Secondary School Certificate (10th)

Angul, Odisha, India

Aug 2020 – May 2021

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript

Frontend: React.js, HTML5, CSS3, SCSS, Figma, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT, Multer, Puppeteer, ASP.NET

Databases: MongoDB (Mongoose), MySQL, SQL Server

Tools & Platforms: Git, GitHub, AWS, Vite, Google Gemini API, MS PowerBI

Concepts: OOP, Data Structures & Algorithms, Operating Systems, Computer Networks, RESTful Architecture, SDLC

EXPERIENCE

Vocational Trainee – IT & Systems

May 2026 – Jun 2026

National Aluminium Company Limited (NALCO), Systems Dept., Smelter Plant

Angul, Odisha, India

- Gained hands-on exposure to enterprise IT operations for 3,000+ employees at one of India's largest aluminium manufacturers (Navratna CPSE), collaborating cross-functionally with the Systems Department.
- Studied end-to-end data centre infrastructure: VMware server virtualization across 10+ servers, SAN storage with SAN switch connectivity, tape-library backup, and a DR site at Damanjodi.
- Observed SDWAN-based WAN architecture connecting 5+ plant units via dual dedicated ILL links, with IMC-based network monitoring and wireless coverage for remote locations.
- Mapped enterprise application ecosystem: SAP ECC (upgrading to SAP HANA) for MM, FICO, SD, and PM modules; MS .NET departmental apps; NIC e-Office for paperless file management.
- Explored Industry 4.0 and IT-OT integration – PLC sensor data pipelines, centralized data warehousing, and operational analytics dashboards built in MS PowerBI, improving plant visibility.
- Observed enterprise security practices: Active Directory domain management for 3,000+ users, SIEM deployment, centralized antivirus, and a planned dedicated SOC centre.
- Delivered a full-stack AI-powered web application as the vocational training capstone project.

Software Development Intern

May 2025 – Jun 2025

NTPC Limited

Angul, Odisha, India

- Developed a Query Resolution Dashboard for IT and departmental teams using **ASP.NET Framework** and **SQL Server**, reducing internal ticket resolution time by **30%** and improving cross-team communication.
- Engineered backend modules to automate ticket routing workflows, reducing manual handoffs and improving stakeholder response times.
- Observed HR data management and financial audit workflows facilitated through Salesforce CRM, strengthening understanding of enterprise data pipelines.

PROJECTS

InterviewIntel – AI Resume Analyzer & Interview Prep Platform

May 2026

MERN Stack, Google Gemini API, Puppeteer, JWT, SCSS, REST API

[GitHub](#)

- Built a scalable full-stack MERN application enabling users to upload PDF resumes and receive AI-generated ATS match scores, skill gap analysis, and personalized interview question banks for technical and behavioral rounds.
- Designed a structured data pipeline using the **@google/genai** SDK with OpenAPI 3.0 responseSchema types to enforce hallucination-free LLM outputs, parsed into typed MongoDB documents.
- Architected a 4-layer React frontend (UI Pages, Custom Hooks, Context API, Axios services) enforcing separation of concerns; improved component reusability and reduced code coupling.
- Implemented JWT authentication with HTTP-only cookies and a TTL-indexed MongoDB token blacklisting collection, protecting against XSS and token replay attacks.
- Integrated Puppeteer headless Chrome to compile AI-generated HTML into downloadable A4 PDF resumes tailored to target job descriptions, streamed as binary attachments to the browser.

VITB Medical Assistance Web Portal

Jan 2025

HTML5, CSS3, JavaScript, Responsive Design

- Built responsive user interfaces for a university medical portal serving **1,000+ students and faculty**, supporting online appointment scheduling, medical records access, and a health resources directory.
- Collaborated in a 4-member Agile team to deliver seamless frontend-backend integration with full desktop and mobile compatibility, applying mobile-first layout principles.

EXTRACURRICULAR ACTIVITIES

Core Member – Web Development Team

January 2025 – Present

iCreate Club, VIT Bhopal University

Bhopal, Madhya Pradesh, India

- Designed and maintained responsive club websites using HTML, CSS, and JavaScript.
- Created appealing UI layouts and enhanced user experience through Figma prototypes and wireframes.
- Partnered with cross-functional teams to deliver digital solutions for club events.
- Applied mobile-friendly designs aligned with the club's branding requirements.
- Contributed to boosting club engagement through improved web presence and consistent interface design.
